

SUMMARY

Seasoned, full-stack software engineer with 2+ years background in developing scalable innovative solutions to enhance business success. Experienced in all aspects of the software development life cycle, skilled in problem solving and effective communication.

SKILLS/TECHNOLOGIES

React.js, Next.js, React Native, Node.js, Express, Nest.js, mongodb, postgresql, git, trello, notions, jira, git lab, redox, testing library jest, super test, postman, axios, figma, redis, heroku, digital ocean, mysql.

EXPERIENCE

Axxon Integrated Solutions, Abuja Nigeria – *React Native Engineer* –(contract)

JANUARY 2022 – FEBRUARY 2022

- Increased user experience by implementing a new ui.
- Increase app performance and reduce app size by updating legacy code.
- Improved team productivity by engaging in sprint planning.
- Improved code readability and reusability by building out reusable react native components.

Technologies used: javascript, git lab, redux, react native, figma.

Shecluded, Lagos Nigeria – *React Native Engineer* –(contract)

DECEMBER 2021 – FEBRUARY 2022

- Increased user experience by implementing a new ui.
- Increased app performance by making use of a cdn for content serving.
- Increased app functionality by integrating rest api.
- Enforced quality code by assisting in reviewing pull requests.
- Improved team productivity by engaging in sprint planning.
- Improved code readability and reusability by building out reusable react native components.

Technologies used: typescript, jira, bitbucket, testing-library, redux, figma.

Renaissance Innovations Labs, Portharcourt Nigeria

APRIL 2021 – FEBRUARY 2022

CTO SEPTEMBER 2021 – FEBRUARY 2022 :

- Ensured scalability of a product by designing and implementing a microservice architecture.
- Reduced the number of api calls for a product by building a proxy Server.
- Reduced development time of new products by implementing reusable micro services.

- Improved the user experience in an existing vue application by implementing new ui and api calls.
- Improved the visibility of a product building out a landing page.
- Reduced bugs and improved user experience by writing automated tests.

REACT NATIVE ENGINEER APRIL 2021 – SEPTEMBER 2021 :

- Increased user experience by implementing a new ui.
- Extended apps functionality by implementing new features
- Increased user experience by fixing issues with mobile responsiveness.
- Reduced development time by implementing a pdf/image to json server for better file parsing.
- Improved team productivity by engaging in sprint planning.
- Improved code readability and reusability by building out reusable react native components.
- Reduced bugs and improved user experience by writing automated tests.

Technologies used: javascript, typescript, postgres, typeorm, mongodb, react, react-native, next js, jest, supertest, testing library, git lab, express, jira, slack, postman, axios, redis, figma, heroku, trello, digital ocean vue.

Savest, Lagos Nigeria – *React Native Engineer Intern*

JULY 2020 – OCTOBER 2020

- Increased user experience by implementing a new ui.
- Reduced bugs and improved user experience by writing automated tests.
- Improved code quality by engaging in peer reviews.
- Improved team productivity by engaging in sprint planning
- Improved code readability and reusability by building out reusable react and react native components.
- Increased app functionality by integrating a rest api.

Technologies used: javascript, axios, jest, testing library, react, react native, notion, figma.

Invest Naira, Ogun Nigeria – *Junior React Native Engineer*

JUNE 2020 – DECEMBER 2020

- Increased user experience by implementing a new ui.
- Improved team productivity by engaging in sprint planning.
- Improved code readability and reusability by building out reusable react native components.
- Increased app functionality by integrating a rest api.

Technologies used: javascript, adobe xd, redux, axios.

EDUCATION

Covenant University, Ogun Nigeria – *Bsc*

SEPTEMBER 2016 – SEPTEMBER 2021

Bsc in Computer Science.

LEADERSHIP AND AWARDS

Was one of the 30 applicants that were selected for the innovators program at Renaissance Innovations Labs in 2021.
